The Schaeffer Center at USC is one of the leading health policy research centers in the United States. Currently, the Schaeffer Center conducts research and policy analysis to support evidence-based health care reform. Studies underway focus on critical health policy issues related to health care spending and value, the impacts of public policy on pharmaceutical innovation, insurance design, the macroeconomic consequences of US health care costs and comparative effectiveness & outcomes research.

Matthew Neidell is an Associate Professor in the Department of Health Policy and Management at the Mailman School of Public Health at Columbia University. His research focuses on environmental and health issues from an economic perspective. Dr. Neidell received his PhD in economics from UCLA. Prior to his appointment at Columbia University, he was a post-doctoral research associate at the University of Chicago in the Department of Economics and Center for Integrating Statistical and Environmental Science.
