**Provider Responses to a Global Budget System: The Case of Drug Expenditures in Taiwan Hospitals**

**Shin-Yi Chou** is Frank L., Magee Professor of Economics at Lehigh University. She is also a Research Associate at the National Bureau of Economics Research. She received her B.A. from National Taiwan University in 1994 and her Ph.D. from Duke University in 1999. Dr Chou’s research focuses on economics of health and health care. Her two primary research interests are health and wellbeing of children and cost and quality of health care sector. Her current research focuses on intergenerational transmission of low birth weight, parental loss and child wellbeing, adoption of health information technology and pregnant outcomes, global budgets for health care and health care report cards.

*The Schaeffer Center* at USC is one of the leading health policy research centers in the United States. Currently, the Schaeffer Center conducts research and policy analysis to support evidence-based health care reform. Studies underway focus on critical health policy issues related to health care spending and value, the impacts of public policy on pharmaceutical innovation, insurance design, the macroeconomic consequences of US health care costs and comparative effectiveness & outcomes research.
