Tim Moore is an Assistant Professor of Economics at George Washington University, a Faculty Research Fellow of the National Bureau of Economic Research. Tim's areas of specialization are Social Security Disability Insurance and its effect on individuals' health and labor force participation; the short-term relationships between income, economic activity and health; and illicit drug markets. He has published articles in several leading economics journals, including the Review of Economics and Statistics and the Journal of Public Economics. He received his PhD from the University of Maryland in 2012.

As one of the nation's premiere policy research centers, the mission of **the Leonard D. Schaeffer Center for Health Policy and Economics** at the University of Southern California is to promote health and value in healthcare delivery through innovative research and policy, both in the United States and internationally.

The Schaeffer Center is a joint endeavor of the USC Sol Price School of Public Policy and the USC School of Pharmacy.
